## **Independent Auditor's Report**

To the Board of Directors  
Grand Rapids Child Discovery Center

### **Report on the Financial Statements**

We have audited the accompanying basic financial statements of the governmental activities and the major fund of Grand Rapids Child Discovery Center (the "School") as of and for the year ended June 30, 2020 and the related notes to the financial statements, which collectively comprise Grand Rapids Child Discovery Center's financial statements, as listed in the table contents.

#### ***Management's Responsibility for the Financial Statements***

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### ***Auditor's Responsibility***

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### ***Opinions***

In our opinion, the basic financial statements referred to above present fairly, in all material respects, the financial position of the governmental activities and major fund of Grand Rapids Child Discovery Center as of June 30, 2020 and the changes in its financial position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

To the Board of Directors  
Grand Rapids Child Discovery Center

**Required Supplemental Information**

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, pension and OPEB system schedules of finding progress and employer contributions, and the major fund budgetary comparison schedule be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplemental information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

**Other Reporting Required by Government Auditing Standards**

In accordance with *Government Auditing Standards*, we have also issued our report dated September 25, 2020 on our consideration of Grand Rapids Child Discovery Center's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Grand Rapids Child Discovery Center's internal control over financial reporting and compliance.

*Plante & Moran, PLLC*

September 25, 2020

Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of  
Financial Statements Performed in Accordance with *Government Auditing Standards*

**Independent Auditor's Report**

To Management and the Board of Directors  
Grand Rapids Child Discovery Center

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Grand Rapids Child Discovery Center (the "School") as of and for the year ended June 30, 2020 and the related notes to the financial statements and have issued our report thereon dated September 25, 2020.

**Internal Control Over Financial Reporting**

In planning and performing our audit of the financial statements, we considered the School's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the School's internal control. Accordingly, we do not express an opinion on the effectiveness of the School's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the School's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

**Compliance and Other Matters**

As part of obtaining reasonable assurance about whether the School's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

To Management and the Board of Directors  
Grand Rapids Child Discovery Center

**Purpose of This Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the School's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the School's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

*Plante & Moran, PLLC*

September 25, 2020

This section of the annual financial report for Grand Rapids Child Discovery Center (the "School") presents our discussion and analysis of the School's financial performance during the year ended June 30, 2020. Please read it in conjunction with the School's financial statements, which immediately follow this section.

### ***Using This Annual Report***

This annual report consists of a series of financial statements and notes to those financial statements. These statements are organized so the reader can understand Grand Rapids Child Discovery Center financially as a whole. The government-wide financial statements provide information about the activities of the whole School, presenting both an aggregate view of the School's finances and a longer-term view of those finances. The fund financial statements provide the next level of detail. For governmental activities, these statements tell how services were financed in the short-term and what remains for future spending. The fund financial statements look at the School's operations in more detail than the government-wide financial statements by providing information about the School's most significant fund, the General Fund, with all other funds presented in one column as nonmajor funds. This report is composed of the following elements:

### **Management's Discussion and Analysis (MD&A) (Required Supplemental Information)**

#### **Basic Financial Statements**

Government-wide Financial Statements

Fund Financial Statements

Notes to Financial Statements

#### **Required Supplemental Information**

Budgetary Comparison Schedule - General Fund

Schedule of the School's Proportionate Share of the Net Pension Liability

Schedule of Pension Contributions

Schedule of the School's Proportionate Share of the Net OPEB Liability

Schedule of OPEB Contributions

### ***Reporting the School as a Whole - Government-wide Financial Statements***

One of the most important questions asked about the School is, "As a whole, what is the School's financial condition as a result of the year's activities?" The statement of net position and the statement of activities, which appear first in the School's financial statements, report information on the School as a whole and its activities in a way that helps you answer this question. We prepare these statements to include all assets, deferred outflows of resources, liabilities, and deferred inflows of resources, using the accrual basis of accounting, which is similar to the accounting used by most private sector companies. All of the current year's revenue and expenses are taken into account regardless of when cash is received or paid.

These two statements report the School's net position - the difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources, as reported in the statement of net position - as one way to measure the School's financial health or financial position. Over time, increases or decreases in the School's net position - as reported in the statement of activities - are indicators of whether its financial health is improving or deteriorating. The relationship between revenue and expenses is the School's operating results. However, the School's goal is to provide services to our students, not to generate profits as commercial entities do. One must consider many other nonfinancial factors, such as the quality of the education provided and the safety of the schools, to assess the overall health of the School.

The statement of net position and the statement of activities report the governmental activities for the School, which encompass all of the School's services, including instruction, support services, and community services. Unrestricted state aid (foundation allowance revenue) and state and federal grants finance most of these activities.

# Grand Rapids Child Discovery Center

## Management's Discussion and Analysis (Continued)

### Reporting the School's Funds - Governmental Fund Financial Statements

All of the School's services are reported in the General Fund, which is a governmental fund. Governmental fund reporting focuses on showing how money flows into and out of funds and the balances left at year end that are available for spending. They are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the operations of the School and the services it provides. Governmental fund information helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the School's programs. We describe the relationship (or differences) between governmental activities (reported in the statement of net position and the statement of activities) and governmental funds in a reconciliation.

### The School as a Whole

Recall that the statement of net position provides the perspective of the School as a whole. The following table provides a summary of the School's net position as of June 30, 2020 and 2019:

	Governmental Activities	
	2020	2019
	(in thousands)	
<b>Assets</b>		
Current and other assets	\$ 942.0	\$ 840.0
Capital assets	733.2	768.2
Total assets	1,675.2	1,608.2
<b>Deferred Outflows of Resources</b>	1,688.2	1,710.2
<b>Liabilities</b>		
Current liabilities	258.3	275.3
Noncurrent liabilities	414.3	443.7
Net pension liability	4,523.3	4,066.2
Net OPEB liability	997.2	1,136.4
Total liabilities	6,193.1	5,921.6
<b>Deferred Inflows of Resources</b>	744.8	737.8
<b>Net Position</b>		
Net investment in capital assets	338.8	340.4
Unrestricted	(3,913.3)	(3,681.4)
Total net position	<u>\$ (3,574.5)</u>	<u>\$ (3,341.0)</u>

The above analysis focuses on net position. The change in net position of the School's governmental activities is discussed below. The School's net position was \$(3,574.5) thousand at June 30, 2020. Net investment in capital assets totaling \$338.8 thousand, compares the original cost, less depreciation of the School's capital assets, to long-term debt used to finance the acquisition of those assets. The remaining amount of net position (\$(3,913.3) million) was unrestricted.

The \$(3,913.3) thousand deficit in unrestricted net position of governmental activities represents the accumulated results of all past years' operations. The deficit balance is primarily the result of the requirement to report the School's proportionate share of the net pension and OPEB liabilities on the statement of net position. The unrestricted net position balance enables the School to meet working capital and cash flow requirements and provide for future uncertainties. The operating results of the General Fund will have a significant impact on the change in unrestricted net position from year to year.

## Grand Rapids Child Discovery Center

### Management's Discussion and Analysis (Continued)

The results of this year's operations for the School as a whole are reported in the condensed statement of activities below, which shows the changes in net position for the years ended June 30, 2020 and 2019:

	Governmental Activities	
	2020	2019
	(in thousands)	
<b>Revenue</b>		
Program revenue - Operating grants	\$ 588.7	\$ 541.1
General revenue:		
State aid not restricted to specific purposes	2,195.8	2,124.8
Other	16.0	15.8
	<u>2,800.5</u>	<u>2,681.7</u>
Total revenue		
<b>Expenses</b>		
Instruction	2,117.3	1,858.5
Support services	856.2	842.7
Food services	4.3	3.6
Debt service	18.0	19.7
Depreciation expense (unallocated)	38.2	42.3
	<u>3,034.0</u>	<u>2,766.8</u>
Total expenses		
<b>Change in Net Position</b>	(233.5)	(85.1)
<b>Net Position - Beginning of year</b>	<u>(3,341.0)</u>	<u>(3,255.9)</u>
<b>Net Position - End of year</b>	<u><u>\$ (3,574.5)</u></u>	<u><u>\$ (3,341.0)</u></u>

As reported in the statement of activities, the cost of all of our governmental activities this year was \$3,034.0 thousand. Certain activities were partially funded from those who benefited from the programs or by other governments and organizations that subsidized certain programs with grants and contributions (\$588.7 thousand). We paid for the remaining public benefit portion of our governmental activities with \$2,195.8 thousand in state foundation allowance and with our other revenue (i.e., interest and general entitlements).

The School experienced a decrease in net position of \$233.5 million. Key reasons for the change in net position were the cumulative effect of accounting for the pension benefits.

As discussed above, the net cost shows the financial burden that was placed on the State and the School's taxpayers by each of these functions. Since unrestricted state aid constitutes the vast majority of school operating revenue sources, the board of directors and administration must annually evaluate the needs of the School and balance those needs with state-prescribed available unrestricted resources.

#### ***The School's Funds***

As we noted earlier, the School uses funds to help it control and manage money for particular purposes. Looking at funds helps the reader consider whether the School is being accountable for the resources taxpayers and others provide to it and may provide more insight into the School's overall financial health.

As the School completed this year, the governmental funds reported a combined fund balance of \$638.6 thousand, which is an increase of \$106.9 thousand from last year. The primary reasons for the increase are as follows:

#### **Revenue Changes**

- Increase in total revenue of \$40.9 thousand, which includes the following:
  - Increase in state aid funding of \$88.9 thousand based on budgetary increases and increased student count; however, there was a \$48.5 thousand decrease in funding based on the August state aid report due to COVID-19 (this is accounted for in the overall increase in funding).

## Grand Rapids Child Discovery Center

### Management's Discussion and Analysis (Continued)

- Decrease in federal source revenue of \$14.7 thousand
- Decrease in local source revenue of \$28.7 thousand

#### **Expenditure Changes**

- Increase in wages and benefits of \$135.6 thousand due to staff transitions and additions, wage increases, and corresponding retirement contributions and increase in health insurance costs
- Decrease in basic programming expenses of \$10.8 thousand due to reduced needs based on the School being closed for the majority of the second semester due to COVID-19
- Decrease in supporting services of \$84.4 thousand due to reduced needs based on the School being closed for the majority of the second semester due to COVID-19. This includes a reduction in the following expenses:
  - \$12 thousand reduction in purchased services for special education services provided by Grand Rapids Public Schools (GRPS)
  - \$12.8 thousand increase in occupancy expenditures due to increase in repairs and maintenance and grounds services
  - \$77.1 thousand decrease in capital outlay expenditures based on building improvements and technology purchases that occurred in the prior fiscal year

#### **General Fund Budgetary Highlights**

Over the course of the year, the School revises its budget as it attempts to deal with unexpected changes in revenue and expenditures. State law requires that the budget be amended to ensure that expenditures do not exceed appropriations. The final amendment to the budget was adopted in June 2020. A schedule showing the School's original and final budget amounts compared with amounts actually paid and received is provided in required supplemental information of these financial statements.

Various revisions were made to the 2019-2020 General Fund original budget and are explained in detail below. Budgeted revenue was increased by \$58.2 thousand. The primary reason for the increase is as follows:

- Increase of \$47.1 thousand in certain categorical revenue from the State and foundation payments due to actual student enrollment being greater than original estimates

Budgeted expenditures were decreased \$59.3 thousand. The primary reasons for the decrease is as follows:

- (Net) increase of \$60.3 thousand in instruction - basic programs related to staff transitions and additions, wage increases, and corresponding retirement contributions and increase in health insurance costs
- The total budget for instructional staff (support services) increased by \$102 thousand, while the total budget for school administration decreased by the same amount due to a reclassification of services provided.
- Decrease of \$91.3 thousand in capital outlay due to holding off on building projects to conserve money due to the unknown environment surrounding COVID-19

As the School completed this year, there was a positive net variance of \$2.7 thousand between the final budget and actual amounts. The primary reasons for the increase are as follows:

- Decrease of \$56.9 in state source revenue based on state-level budget reductions due to COVID-19 that were not made available until the August state aid report
- Decrease of \$13.3 in employee benefit and professional development expenditures
- Decrease of \$11.5 thousand in occupancy expenses earmarked for repairs and maintenance

# Grand Rapids Child Discovery Center

## Management's Discussion and Analysis (Continued)

- Decrease of \$19.8 thousand in capital outlay related to building improvements and technology - most of which will be carried forward to FY 2021

### **Capital Assets and Debt Administration**

#### **Capital Assets**

As of June 30, 2020 and 2019, the School had \$733.2 thousand and \$768.2 thousand, respectively, invested in a broad range of capital assets, including land, buildings, furniture, and equipment. This represents a net decrease (including additions, disposals, and depreciation) of approximately \$35.0 thousand from 2019 to 2020.

	2020	2019
Land	\$ 100,000	\$ 100,000
Buildings and improvements	543,813	568,259
Furniture and equipment	18,558	24,561
Land improvements	70,861	75,387
Total capital assets - Net of accumulated depreciation	<b>\$ 733,232</b>	<b>\$ 768,207</b>

This year's additions of \$3.2 thousand included technology and building renovations. Major capital projects are on hold for the 2020-2021 fiscal year due to the unknown budget cuts and circumstances related to COVID-19. We anticipate capital additions will be comparable to this year. We present more detailed information about our capital assets in the notes to the financial statements.

#### **Debt**

At the end of this year, the School had \$414.0 thousand in liabilities outstanding versus \$443.7 thousand in the previous year.

Those liabilities consisted of the following:

	2020	2019
Commercial mortgage	\$ 372,941	\$ 396,865
Capital lease	21,508	30,985
Compensated absences	19,875	15,853
Total	<b>\$ 414,324</b>	<b>\$ 443,703</b>

We present more detailed information about our long-term liabilities in the notes to the financial statements.

### **Economic Factors and Next Year's Budgets and Rates**

Our board of directors and administration consider many factors when setting the School's 2020-2021 fiscal year budget. One of the most important factors affecting the budget is our student count. The state foundation revenue is determined by multiplying the blended student count by the foundation allowance per pupil. The 2020-2021 budget was adopted in June 2020 based on an estimate of 250 students expected to enroll in September 2020. Approximately 82.0 percent of total General Fund revenue is from the foundation allowance. Under state law, the School cannot access additional property tax revenue for general operations. As a result, school funding is heavily dependent on the State's ability to fund local school operations. Based on various and unknown factors related to COVID-19, we anticipate that the fall student count will be approximately 5 percent less than FY 2020. The estimates used in creating the FY 2021 budget were conservative, and the actual student count is expected to be closer to 268. Once the final student count and related per pupil funding are validated, state law requires the School to amend the budget if actual school resources are not sufficient to fund original appropriations.

Since the School's revenue is heavily dependent on state funding and the health of the State's School Aid Fund, the actual revenue received depends on the State's ability to collect revenue to fund its appropriation to the School. The state periodically holds a Revenue Estimating Conference to estimate revenue. Based on the results of the most recent conference, the State estimates funds are sufficient to fund the appropriation, restoring the \$175 per pupil cut from FY 2020.

**Grand Rapids Child Discovery Center**

**Management's Discussion and Analysis (Continued)**

The labor contract with the GREA union is currently up for renewal but is temporarily on hold due to discussions and unknown funding issues related to COVID-19. The financial impact on operations of the School is currently unknown.

# Grand Rapids Child Discovery Center

## Statement of Net Position

## Governmental Fund Reconciliation of the Balance Sheet to the Statement of Net Position

June 30, 2020

<b>Fund Balance Reported in the Governmental Fund</b>	\$ 638,635
Amounts reported for governmental activities in the statement of net position are different because:	
Capital assets used in governmental activities are not financial resources and are not reported in the funds:	
Cost of capital assets	1,156,658
Accumulated depreciation	<u>(423,426)</u>
Net capital assets used in governmental activities	733,232
Receivables that are not collected soon after year end are not available to pay for current period expenditures and, therefore, are reported as unavailable revenue in the funds	45,000
Mortgage payable and capital lease obligations are not due and payable in the current period and are not reported in the funds	(394,449)
Some employee fringe benefits are payable over a long period of years and do not represent a claim on current financial resources; therefore, they are not reported as fund liabilities:	
Employee compensated absences	(19,875)
Net pension liability and related deferred inflows and outflows	(3,362,185)
Net OPEB liability and related deferred inflows and outflows	(1,059,415)
Revenue in support of pension contributions made subsequent to the measurement date is reported as a deferred inflow of resources in the statement of net position and is not reported in the funds	<u>(155,493)</u>
<b>Net Position of Governmental Activities</b>	<b><u><u>\$ (3,574,550)</u></u></b>

# Grand Rapids Child Discovery Center

<b>Net Change in Fund Balance</b>	106,951
<b>Fund Balance - Beginning of year</b>	<u>531,684</u>
<b>Fund Balance - End of year</b>	<u><u>\$ 638,635</u></u>

## Grand Rapids Child Discovery Center

### Governmental Fund Reconciliation of the Statement of Revenue, Expenditures, and Changes in Fund Balance to the Statement of Activities

Year Ended June 30, 2020

<b>Net Change in Fund Balance Reported in the Governmental Fund</b>	\$ 106,951
Amounts reported for governmental activities in the statement of activities are different because:	
Governmental funds report capital outlays as expenditures; however, in the statement of activities, these costs are allocated over their estimated useful lives as depreciation:	
Capitalized capital outlay	3,209
Depreciation expense	(38,184)
Revenue in the statement of activities that does not provide current financial resources is not reported as revenue in the fund until it is available	12,000
Revenue in support of pension contributions made subsequent to the measurement date	4,481
Repayment of mortgage principal and capital lease is an expenditure in the governmental funds but not in the statement of activities (where it reduces long-term debt); amortization of premium/discounts and inflows/outflows related to bond refundings are not expenses in the governmental funds	33,401
Some employee costs (pension, OPEB, and compensated absences) do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds	(355,407)
<b>Change in Net Position of Governmental Activities</b>	<b><u>\$ (233,549)</u></b>

June 30, 2020

### **Note 1 - Nature of Business**

Grand Rapids Child Discovery Center (the "School") is a charter school academy in the State of Michigan that provides educational services to students.

### **Note 2 - Significant Accounting Policies**

#### ***Accounting and Reporting Principles***

The School follows accounting principles generally accepted in the United States of America (GAAP), as applicable to governmental units. Accounting and financial reporting pronouncements are promulgated by the Governmental Accounting Standards Board (GASB). The following is a summary of the significant accounting policies used by the School:

#### ***Reporting Entity***

The School was formed as a charter school academy pursuant to the Michigan School Code of 1976, as amended by Act No. 362 of the Public Acts of 1993 and Act No. 416 of the Public Acts of 1994. On January 1, 2000, the School entered into a five-year contract with the Grand Rapids Public Schools Board of Education to charter the School. This contract has since been extended through June 30, 2023. The contract requires the School to act exclusively as a governmental agency and not undertake any action inconsistent with its status as an entity authorized to receive state school aid funds pursuant to the state constitution. The Grand Rapids Public Schools' Board of Education is the fiscal agent for the School and is responsible for overseeing the School's compliance with the contract and all applicable laws. The School pays the Grand Rapids Public Schools' Board of Education 3.0 percent of state aid as administrative fees. The administrative fees for the year ended June 30, 2020 to the Grand Rapids Public Schools' Board of Education totaled approximately \$67,000.

The accompanying financial statements have been prepared in accordance with criteria established by the Governmental Accounting Standards Board for determining the various governmental organizations to be included in the reporting entity. These criteria include significant operational or financial relationships with the School. Based on application of the criteria, the School does not contain any component units.

#### ***Report Presentation***

Governmental accounting principles require that financial reports include two different perspectives - the government-wide perspective and the fund-based perspective. The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units, as applicable. The government-wide financial statements are presented on the economic resources measurement focus and the full accrual basis of accounting. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met. The statements also present a schedule reconciling these amounts to the modified accrual-based presentation found in the fund-based statements.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenue. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenue includes: (1) charges to customers or applicants for goods, services, or privileges provided; (2) operating grants and contributions; and (3) capital grants and contributions, including special assessments. Taxes, unrestricted intergovernmental receipts, and other items not properly included among program revenue are reported instead as general revenue.

**Note 2 - Significant Accounting Policies (Continued)**

***Fund Accounting***

The School accounts for its various activities in one fund to demonstrate accountability for how it spends certain resources; fund accounting allows the School to show the particular expenditures for which specific revenue is used. The School reports the following major governmental fund:

**Governmental Fund**

Governmental funds include all activities that provide general governmental services that are not business-type activities. Governmental funds can include the General Fund, special revenue funds, debt service funds, capital project funds, and permanent funds. The School District's only major fund is the General Fund, which is the primary operating fund because it accounts for all financial resources used to provide government services.

***Basis of Accounting***

The governmental fund uses the current financial resources measurement focus and the modified accrual basis of accounting. This basis of accounting is intended to better demonstrate accountability for how the School has spent its resources.

Expenditures are reported when the goods are received or the services are rendered. Capital outlays are reported as expenditures (rather than as capital assets) because they reduce the ability to spend resources in the future; conversely, employee benefit costs that will be funded in the future (such as pension and retiree health care-related costs or sick and vacation pay) are not counted until they come due for payment. In addition, debt service expenditures, claims, and judgments are recorded only when payment is due.

Revenue is not recognized until it is collected or collected soon enough after the end of the year that it is available to pay for obligations outstanding at the end of the year. For this purpose, the School considers amounts collected within 60 days of year end to be available for recognition. Revenue not meeting this definition is classified as a deferred inflow of resources.

***Specific Balances and Transactions***

**Cash and Cash Equivalents**

Cash and cash equivalents include cash on hand, demand deposits, and short-term investments with a maturity of three months or less when acquired.

**Receivables**

Accounts receivable consist primarily of state school aid, of which payments will be received in July and August that are intended to finance the previous fiscal year. Trade receivables are shown net of an allowance for uncollectible amounts. The School considers all accounts receivable to be fully collectible; accordingly, no allowance for uncollectible amounts is recorded.

**Prepaid Items**

Certain payments to vendors reflect costs applicable to future fiscal years and are recorded as prepaid items in both government-wide and fund financial statements, when applicable.

**Capital Assets**

Capital assets, which include land, buildings, furniture, and equipment, are reported in the applicable governmental activities column in the government-wide financial statements. Capital assets are defined by the School as assets with an initial individual cost of more than \$1,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated acquisition value at the date of donation.

**Note 2 - Significant Accounting Policies (Continued)**

Capital assets are depreciated using the straight-line method over the following useful lives:

	Depreciable Life - Years
Buildings and improvements	10-30
Furniture and equipment	5-10
Land improvements	10-20

**Long-term Obligations**

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities statement of net position. In the fund financial statements, governmental fund types recognize debt issuances as other financing sources.

**Salaries Payable and Accrued Employee Benefits**

A liability is recorded at June 30 for those amounts owed to teachers and other employees of the School who do not work during the summer when school is not in session but have elected to have their salaries paid over an entire year. This has the effect of properly charging their salaries to expenditures in the fiscal year in which their services are received, even though they are not paid until July and August of the following fiscal year. The corresponding liability for accrued retirement and the employer share of FICA related to the salaries payable has been recorded as well.

**Deferred Outflows/Inflows of Resources**

In addition to assets, the statement of net position and /or balance sheet will sometimes report a separate section for deferred outflows of resources. This separate financial statement element represents a consumption of net position that applies to future periods and will not be recognized as an outflow of resources (expense/expenditure) until then.

The School reports deferred outflows related to deferred pension and OPEB plan costs.

In addition to liabilities, the statement of net position and/or balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element represents an acquisition of net position that applies to future periods and will not be recognized as an inflow of resources (revenue) until that time.

The School reports deferred inflows related to revenue in support of pension contributions made subsequent to the measurement date and deferred pension and OPEB plan cost reductions.

**Net Position**

Net position of the School is classified in two components. Net investment in capital assets consists of capital assets net of accumulated depreciation and is reduced by the current balances of any outstanding borrowings used to finance the purchase or construction of those assets. Unrestricted net position is the remaining net position that does not meet the definition of invested in capital or restricted.

**Net Position Flow Assumption**

The School will sometimes fund outlays for a particular purpose from both restricted and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted net position in the government-wide and proprietary fund financial statements (as applicable), a flow assumption must be made about the order in which the resources are considered to be applied. It is the School's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

**Note 2 - Significant Accounting Policies (Continued)**

**Fund Balance Flow Assumptions**

The School will sometimes fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the School's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Furthermore, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

**Fund Balance Policies**

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The nonspendable fund balance component represents amounts that are not in spendable form or are legally or contractually required to be maintained intact. The School itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the School's highest level of decision-making authority. The board of directors is the highest level of decision-making authority for the School that can, by passing a resolution prior to the end of the fiscal year, commit fund balance. Once passed, the limitation imposed by the resolution remains in place until a similar action is taken (the passing of another resolution) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The School has, by resolution, authorized the finance director to assign fund balance. The board of directors may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally exist only temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

**Grants and Contributions**

The School receives federal, state, and local grants, as well as contributions from individuals and private organizations. Revenue from grants and contributions (including contributions of capital assets) is recognized when all eligibility requirements, including time requirements, are met. Grants and contributions may be restricted for either specific operating purposes or for capital purposes. Amounts that are unrestricted or that are restricted to a specific operating purpose are reported as nonoperating revenue. Amounts restricted to capital acquisitions are reported after nonoperating revenue and expenses.

**Pension and Other Postemployment Benefit (OPEB) Plans**

For purpose of measuring the net pension and net OPEB liabilities, deferred outflows of resources and deferred inflows of resources related to each plan, and pension and OPEB expense, information about the fiduciary net position of the Michigan Public School Employees' Retirement System (MPERS) and additions to/deductions from MPERS fiduciary net position have been determined on the same basis as they are reported by MPERS. MPERS uses the economic resources measurement focus and the full accrual basis of accounting. Contribution revenue is recorded as contributions are due, pursuant to legal requirements. Benefit payments (including refunds of employee contributions) are recognized as expenses when due and payable in accordance with the plan benefit terms. Related plan investments are reported at fair value.

**Note 2 - Significant Accounting Policies (Continued)**

**Compensated Absences (Vacation and Sick Leave)**

It is the School's policy to permit qualified union employees to accumulate earned but unused sick and vacation pay benefits. Sick pay is accrued for the estimated amount for vested employee's that the School will pay upon employee retirement; vacation pay is accrued when incurred. A qualified union employee who has reached the age and years of service requirement of the Michigan Public School Retirement Act and completed 10 years of service under the GREA union contract shall receive upon retirement payment for unused sick leave days accumulated as of the time of retirement. Both of these are reported in the government-wide financial statements. A liability for these amounts is reported in governmental funds only for employee retirements as of year end.

**Use of Estimates**

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

**Upcoming Accounting Pronouncement**

In June 2017, the Governmental Accounting Standards Board issued GASB Statement No. 87, *Leases*, which improves accounting and financial reporting for leases by governments. This statement requires recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources. The School is currently evaluating the impact this standard will have on the financial statements when adopted. The provisions of this statement were originally effective for the School's financial statements for the year ending June 30, 2021 but were extended to June 30, 2022 with the issuance of GASB Statement No. 95, *Postponement of the Effective Date of Certain Authoritative Guidance*.

**Note 3 - Stewardship, Compliance, and Accountability**

**Budgetary Information**

Annual budgets are adopted on a basis consistent with generally accepted accounting principles and state law for the General Fund. All annual appropriations lapse at fiscal year end. The budget document presents information by fund and function. The legal level of budgetary control adopted by the governing body (i.e., the level at which expenditures may not legally exceed appropriations) is the function level. State law requires the School to have its budget in place by July 1. Expenditures in excess of amounts budgeted are a violation of Michigan law. State law permits districts to amend their budgets during the year. During the year, the budget was amended in a legally permissible manner. There were no significant amendments during the year.

Encumbrance accounting is employed in governmental funds. Encumbrances (e.g., purchase orders and contracts) are not tracked during the year. Budget appropriations are considered to be spent once the goods are delivered or the services rendered.

**Excess of Expenditures Over Appropriations in Budgeted Funds**

The School did not have significant expenditure budget variances.

June 30, 2020

**Note 4 - Deposits and Investments**

State statutes and the School's investment policy authorize the School to make deposits in the accounts of federally insured banks, credit unions, and savings and loan associations that have offices in Michigan. The School is allowed to invest in U.S. Treasury or agency obligations, U.S. government repurchase agreements, bankers' acceptances, certificates of deposit, commercial paper rated prime at the time of purchase that matures not more than 270 days after the date of purchase, mutual funds, and investment pools that are composed of authorized investment vehicles. The School's deposits and investments are in accordance with statutory authority.

The School has designated one bank for the deposit of its funds.

The School's cash and cash equivalents are subject to several types of risk, which are examined in more detail below:

***Custodial Credit Risk of Bank Deposits***

Custodial credit risk is the risk that, in the event of a bank failure, the School's deposits may not be returned to it. The School does not have a deposit policy for custodial credit risk. At year end, the School had \$177,698 of bank deposits (checking and savings accounts) that was uninsured and uncollateralized. The School believes that, due to the dollar amounts of cash deposits and the limits of FDIC insurance, it is impractical to insure all deposits. As a result, the School evaluates each financial institution with which it deposits funds and assesses the level of risk of each institution; only those institutions with an acceptable estimated risk level are used as depositories.

**Note 5 - Receivables**

Receivables as of June 30, 2020 for the School's individual major fund is as follows:

	Governmental Activities
Receivables:	
State aid	\$ 412,479
Federal grants	12,947
Interdistrict	48,447
Miscellaneous local	5,452
	<hr/>
Total	\$ 479,325
	<hr/> <hr/>

**Note 6 - Unavailable/Unearned Revenue**

Governmental funds report unavailable revenue in connection with receivables for revenue that is not considered to be available to liquidate liabilities of the current period. Governmental funds also report unearned revenue recognition in connection with resources that have been received but not yet earned.

At June 30, 2020, the School had no unearned revenue and had \$45,000 of unavailable revenue primarily related to Act 18 revenue that passes through Kent Intermediate School District.

**June 30, 2020**

**Note 7 - Capital Assets**

Capital asset activity of the School's governmental activities was as follows:

**Governmental Activities**

	Balance July 1, 2019	Additions	Disposals and Adjustments	Balance June 30, 2020
Capital assets not being depreciated - Land	\$ 100,000	\$ -	\$ -	\$ 100,000
Capital assets being depreciated:				
Buildings and improvements	744,781	1,930	-	746,711
Furniture and equipment	220,476	1,279	-	221,755
Land improvements	88,192	-	-	88,192
Subtotal	1,053,449	3,209	-	1,056,658
Accumulated depreciation:				
Buildings and improvements	176,522	26,376	-	202,898
Furniture and equipment	195,915	7,282	-	203,197
Land improvements	12,805	4,526	-	17,331
Subtotal	385,242	38,184	-	423,426
Net capital assets being depreciated	668,207	(34,975)	-	633,232
Net governmental activities capital assets	<u>\$ 768,207</u>	<u>\$ (34,975)</u>	<u>\$ -</u>	<u>\$ 733,232</u>

Depreciation expense was not charged to activities, as the School's assets benefit multiple activities and allocation is impractical.

**Note 8 - Line of Credit**

Under a line of credit agreement with a bank, the School had available borrowings of \$200,000. Interest was payable monthly at a rate of 0.375 percent above the prime rate. The line of credit was collateralized by substantially all assets of the School and expired on January 27, 2020.

**Note 9 - Long-term Debt**

Long-term debt activity for the year ended June 30, 2020 can be summarized as follows:

	Beginning Balance	Additions	Reductions	Ending Balance	Due within One Year
Direct borrowings and direct placements - Commercial mortgage	\$ 396,865	\$ -	\$ (23,924)	\$ 372,941	\$ 25,076
Capital leases (Note 10)	30,985	-	(9,477)	21,508	9,146
Compensated absences	15,853	5,240	(1,218)	19,875	-
Total governmental activities long-term debt	<u>\$ 443,703</u>	<u>\$ 5,240</u>	<u>\$ (34,619)</u>	<u>\$ 414,324</u>	<u>\$ 34,222</u>

**Other Long-term Liabilities**

The commercial mortgage is due in monthly installments of \$3,452, including interest at 4.46 percent through 2022, ending with a balloon payment.

**Note 9 - Long-term Debt (Continued)**

***Debt Service Requirements to Maturity***

Annual debt service requirements to maturity for the above note obligations are as follows:

Years Ending June 30	Governmental Activities		
	Direct Borrowings and Direct Placements		
	Principal	Interest	Total
2021	\$ 25,076	\$ 16,350	\$ 41,426
2022	347,865	9,051	356,916
Total	\$ 372,941	\$ 25,401	\$ 398,342

**Note 10 - Leases**

***Capital Leases***

The School has entered into a lease agreement as lessee for copiers, other computer equipment, and lighting equipment. The total original capital lease liability is \$37,785, with an interest rate of 3.27 percent and monthly payments between \$332 and \$497. These lease agreements qualify as a capital lease for accounting purposes and, therefore, have been recorded at the present value of the future minimum lease payments as of the inception date. The future minimum lease obligation and the net present value are as follows:

Year Ending	Amount
2021	\$ 9,614
2022	5,964
2023	5,964
2024	1,491
Total	23,033
Less amount representing interest	1,525
Present value	\$ 21,508

The cost and related accumulated depreciation on the capital leases are included within capital assets further disclosed in Note 7.

**Note 11 - Risk Management**

The School is exposed to various risks of loss related to property loss, torts, errors and omissions, and employee injuries (workers' compensation), as well as medical benefits provided to employees. The School has purchased commercial insurance for all claims. Settled claims relating to the commercial insurance have not exceeded the amount of insurance coverage in any of the past three fiscal years.

June 30, 2020

**Note 12 - Michigan Public School Employees' Retirement System**

***Plan Description***

The School participates in the Michigan Public School Employees' Retirement System (the "System"), a statewide, cost-sharing, multiple-employer defined benefit public employee retirement system governed by the State of Michigan that covers substantially all employees of the School. Certain school employees also receive defined contribution retirement and health care benefits through the System. The System provides retirement, survivor, and disability benefits to plan members and their beneficiaries. The System also provides postemployment healthcare benefits to retirees and beneficiaries who elect to receive those benefits.

The System is administered by the Office of Retirement Services (ORS). The Michigan Public School Employees' Retirement System issues a publicly available financial report that includes financial statements and required supplemental information for the pension and postemployment health care plans. That report is available on the web at <http://www.michigan.gov/orsschools> or by writing to the Office of Retirement Services at 7150 Harris Drive, P.O. Box 30171, Lansing, MI 48909.

***Benefits Provided***

Benefit provisions of the defined benefit (DB) pension plan and the postemployment health care plan are established by state statute, which may be amended. Public Act 300 of 1980, as amended, establishes eligibility and benefit provisions for the defined benefit pension plan and the postemployment health care plan.

Depending on the plan option selected, member retirement benefits are calculated as final average compensation times years of services times a pension factor ranging from 1.25 percent to 1.50 percent. The requirements to retire range from attaining the age of 46 to 60 with years of service ranging from 5 to 30 years, depending on when the employee became a member. Early retirement is computed in the same manner as a regular pension but is permanently reduced 0.50 percent for each full and partial month between the pension effective date and the date the member will attain age 60. There is no mandatory retirement age.

Depending on the member's date of hire, MPSERS offers the option of participating in the defined contribution (DC) plan that provides a 50 percent employer match (up to 3 percent of salary) on employee contributions.

Members are eligible for nonduty disability benefits after 10 years of service and for duty-related disability benefits upon hire. Disability retirement benefits are determined in the same manner as retirement benefits but are payable immediately without an actuarial reduction. The disability benefits plus authorized outside earnings are limited to 100 percent of the participant's final average compensation, with an increase of 2 percent each year thereafter.

Benefits may transfer to a beneficiary upon death and are determined in the same manner as retirement benefits but with an actuarial reduction.

Benefit terms provide for annual cost of living adjustments to each employee's retirement allowance subsequent to the employee's retirement date. The annual adjustment, if applicable, is 3 percent. Some members who do not receive an annual increase are eligible to receive a supplemental payment in those years when investment earnings exceed actuarial assumptions.

MPSERS provides medical, prescription drug, dental, and vision coverage for retirees and beneficiaries. A subsidized portion of the premium is paid by MPSERS, with the balance deducted from the monthly pension of each retiree health care recipient. Depending on the member's date of hire, this subsidized portion ranges from 80 percent to the maximum allowed by the statute.

June 30, 2020

**Note 12 - Michigan Public School Employees' Retirement System (Continued)**

**Contributions**

Public Act 300 of 1980, as amended, required the School to contribute amounts necessary to finance the coverage of pension benefits of active and retired members. Contribution provisions are specified by state statute and may be amended only by action of the state Legislature. Under these provisions, each school district's contribution is expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance a portion of the unfunded accrued liability.

Under the OPEB plan, retirees electing this coverage contribute an amount equivalent to the monthly cost for Part B Medicare and 10 percent, or 20 percent for those not Medicare eligible, of the monthly premium amount for the health, dental, and vision coverage at the time of receiving the benefits. The MPSERS board of trustees annually sets the employer contribution rate to fund the benefits. Participating employers are required to contribute at that rate.

Under Public Act 300 of 2012, members were given the choice between continuing the 3 percent contribution to the retiree health care and keeping the premium subsidy benefit described above or choosing not to pay the 3 percent contribution and, instead, opting out of the subsidy benefit and becoming a participant in the Personal Healthcare Fund (PHF), a portable tax-deferred fund that can be used to pay health care expenses in retirement. Participants in the PHF are automatically enrolled in a 2 percent employee contribution into their 457 account as of their transition date, earning them a 2 percent employer match into a 401(k) account. Members who selected this option stop paying the 3 percent contribution to the retiree health care as of the day before their transition date, and their prior contributions were deposited into their 401(k) account.

The School's contributions are determined based on employee elections. There are multiple different pension and healthcare benefit options included in the plan available to employees based on date of hire and the elections available at that time. Contribution rates are adjusted annually by the ORS.

The range of rates is as follows:

	Pension	OPEB
October 1, 2018 - September 30, 2019	13.39% - 19.59%	7.57% - 7.93%
October 1, 2019 - September 30, 2020	13.39% - 19.59%	7.57% - 8.09%

Depending on the plan selected, member pension contributions range from 0 percent up to 7.0 percent of gross wages. For certain plan members, a 4 percent employer contribution to the defined contribution pension plan is required. In addition, for certain plan members, a 3 percent employer match is provided to the defined contribution pension plan.

The School's required and actual pension contributions to the plan for the year ended June 30, 2020 were \$426,966, which include the School's contributions required for those members with a defined contribution benefit. The School's required and actual pension contributions include an allocation of \$155,493 in revenue received from the State of Michigan and remitted to the System to fund the MPSERS unfunded actuarial accrued liability (UAAL) stabilization rate for the year ended June 30, 2020.

The School's required and actual OPEB contributions to the plan for the year ended June 30, 2020 were \$117,916, which include the School's contributions required for those members with a defined contribution benefit.

**Note 12 - Michigan Public School Employees' Retirement System (Continued)**

***Net Pension Liability***

At June 30, 2020, the School reported a liability of \$4,523,325 for its proportionate share of the net pension liability. The net pension liability was measured as of September 30, 2019, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of September 30, 2018, which used update procedures to roll forward the estimated liability to September 30, 2019. The School's proportion of the net pension liability was based on a projection of its long-term share of contributions to the pension plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2019 and 2018, the School's proportion was 0.0137 and 0.0135 percent, respectively, representing a change of 0.10 percent.

***Net OPEB Liability***

At June 30, 2020, the School reported a liability of \$997,197 for its proportionate share of the net OPEB liability. The net OPEB liability for fiscal year 2020 was measured as of September 30, 2019, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of September 30, 2018, which used update procedures to roll forward the estimated liability to September 30, 2019. The School's proportion of the net OPEB liability was based on a projection of its long-term share of contributions to the OPEB plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2019 and 2018, the School's proportion was 0.0139 and 0.0143 percent, respectively, representing a change of (2.82) percent.

***Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions***

For 2020, the School recognized pension expense of \$790,563, inclusive of payments to fund the MPSERS UAAL stabilization rate. At June 30, 2020, the School reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 20,275	\$ (18,862)
Changes in assumptions	885,670	-
Net difference between projected and actual earnings on pension plan investments	-	(144,965)
Changes in proportion and differences between the School's contributions and proportionate share of contributions	87,873	(8,756)
The School's contributions to the plan subsequent to the measurement date	339,905	-
Total	\$ 1,333,723	\$ (172,583)

The \$155,493 reported as deferred inflows of resources resulting from the pension portion of state aid payments received pursuant to the UAAL payment will be recognized as state appropriations revenue for the year ending June 30, 2021. Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Years Ending	Amount
2021	\$ 327,808
2022	259,645
2023	169,224
2024	64,558
Total	\$ 821,235

**June 30, 2020**

**Note 12 - Michigan Public School Employees' Retirement System (Continued)**

In addition, the contributions subsequent to the measurement date will be included as a reduction of the net pension liability in the next year.

***OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB***

For the year ended June 30, 2020, the School recognized OPEB expense of \$35,185.

At June 30, 2020, the School reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	<u>Deferred Outflows of Resources</u>	<u>Deferred Inflows of Resources</u>
Difference between expected and actual experience	\$ -	\$ (365,900)
Changes in assumptions	216,072	-
Net difference between projected and actual earnings on OPEB plan investments	-	(17,342)
Changes in proportionate share or difference between amount contributed and proportionate share of contributions	61,001	(33,483)
Employer contributions to the plan subsequent to the measurement date	77,434	-
Total	<u>\$ 354,507</u>	<u>\$ (416,725)</u>

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows (note that employer contributions subsequent to the measurement date will reduce the net OPEB liability and, therefore, will not be included in future OPEB expense):

<u>Years Ending</u>	<u>Amount</u>
2021	\$ (36,746)
2022	(36,746)
2023	(28,118)
2024	(21,141)
2025	(16,901)
Total	<u>\$ (139,652)</u>

***Actuarial Assumptions***

The total pension liability and total OPEB liability as of September 30, 2019 is based on the results of an actuarial valuation as of September 30, 2018 and rolled forward. The total pension liability and OPEB liability were determined using the following actuarial assumptions:

Actuarial cost method		Entry age normal
Investment rate of return - Pension	6.00% - 6.80%	Net of investment expenses based on the groups
Investment rate of return - OPEB	6.95%	Net of investment expenses based on the groups
Salary increases	2.75% - 11.55%	Including wage inflation of 2.75%
Health care cost trend rate - OPEB	7.50%	(Year 1 graded to 3.5% year 12)
Mortality basis		RP2014 Male and Female Employee Annuitant Mortality tables, scaled 100% (retirees: 82% male and 78% for females) and adjusted for mortality improvements using projection scale MP2017 from 2006
Cost of living pension adjustments	3.00%	Annual noncompounded for MIP members

June 30, 2020

**Note 12 - Michigan Public School Employees' Retirement System (Continued)**

Assumption changes as a result of an experience study for the periods from 2012 to 2017 have been adopted by the System for use in the annual pension and OPEB valuations beginning with the September 30, 2014 valuation.

**Discount Rate**

The discount rate used to measure the total pension liability was 6.00 to 7.05 percent as of September 30, 2019 depending on the plan option. The discount rate used to measure the total OPEB liability was 7.15 percent as of September 30, 2019. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that school contributions will be made at statutorily required rates.

Based on those assumptions, the pension plan's fiduciary net position and the OPEB plan's fiduciary net position were projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan and OPEB plan investments was applied to all periods of projected benefit payments to determine the total pension liability and total OPEB liability.

The long-term expected rate of return on pension plan and OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Domestic equity pools	28.00 %	5.70 %
Private equity pools	18.00	9.20
International equity pools	16.00	7.20
Fixed-income pools	10.50	0.50
Real estate and infrastructure pools	10.00	3.90
Absolute return pools	15.50	5.20
Short-term investment pools	2.00	-
Total	100.00 %	

Long-term rates of return are net of administrative expense and inflation of 2.3 percent.

**Sensitivity of the Net Pension Liability to Changes in the Discount Rate**

The following presents the net pension liability of the School, calculated using the discount rate depending on the plan option. The following also reflects what the School's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease (5.00 - 5.80%)	Current Discount Rate (6.00 - 6.80%)	1 Percentage Point Increase (7.00 - 7.80%)
Net pension liability of the School	\$ 5,880,612	\$ 4,523,325	\$ 3,398,088

June 30, 2020

**Note 12 - Michigan Public School Employees' Retirement System (Continued)**

***Sensitivity of the Net OPEB Liability to Changes in the Discount Rate***

The following presents the net OPEB liability of the School, calculated using the current discount rate. It also reflects what the School's net OPEB liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease (5.95%)	Current Discount Rate (6.95%)	1 Percentage Point Increase (7.95%)
Net OPEB liability of the School	\$ 1,223,212	\$ 997,197	\$ 807,407

***Sensitivity of the Net OPEB Liability to Changes in the Health Care Cost Trend Rate***

The following presents the net OPEB liability of the School District, calculated using the current health care cost trend rate. It also reflects what the School District's net OPEB liability would be if it were calculated using a health care cost trend rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease (6.50%)	Current Health Care Cost Trend Rate (7.50%)	1 Percentage Point Increase (8.50%)
Net OPEB liability of the School	\$ 799,361	\$ 997,197	\$ 1,223,185

***Pension Plan and OPEB Plan Fiduciary Net Position***

Detailed information about the plan's fiduciary net position is available in the separately issued MPSERS financial report.

***Payable to the Pension Plan and OPEB Plan***

At June 30, 2020, the School reported a payable of \$56,434 and \$11,715 for the outstanding amount of contributions to the pension plan and OPEB plan, respectively, required for the year ended June 30, 2020.

**Note 13 - Subsequent Events**

Following the passing of the Coronavirus Aid, Relief, and Economic Security (CARES) Act, which was signed into law on March 27th, 2020 to combat the effects of the COVID-19 pandemic, the U.S. Department of Treasury distributed Coronavirus Relief Fund (CRF) payments to the State of Michigan. During July and August 2020, the School District received \$100,373 of these restricted CRF funds from the Michigan Department of Education. The CRF funds can only be used for eligible costs and are subject to certain Uniform Guidance and grant-specific reporting requirements.

### ***Pension Information***

Ultimately, 10 years of data will be presented in both of the pension-related schedules. The number of years currently presented represents the number of years since the accounting standard requiring these schedules first became applicable.

### **Benefit Changes**

There were no changes of benefit terms for each of the reported plan years ended September 30.

### **Changes in Assumptions**

There were no significant changes of assumptions for each of the reported plan years ended September 30, except for the following:

- 2019 - The discount rate used in the September 30, 2018 actuarial valuation decreased by 0.25 percentage points.
- 2018 - The discount rate used in the September 30, 2017 actuarial valuation decreased by 0.45 percentage points. The valuation also includes the impact of an updated experience study from periods from 2012 to 2017.
- 2017 - The discount rate used in the September 30, 2016 actuarial valuation decreased by 0.50 percentage points.

### ***OPEB Information***

Ultimately, 10 years of data will be presented in both of the OPEB-related schedules. The number of years currently presented represents the number of years since the accounting standard requiring these schedules first became applicable.

### **Benefit Changes**

There were no changes of benefit terms for each of the report plan years ended September 30.

### **Changes in Assumptions**

There were no changes of benefit assumptions for each of the reported plan years ended September 30, except for the following:

- 2019 - The discount rate used in the September 30, 2018 actuarial valuation decreased by 0.20 percentage points. The valuation also includes the impact of an updated experience study for periods from 2012 to 2017. This resulted in a lower than projected per person health benefit cost to reduce the plan's total OPEB liability by an additional \$1.4 billion in 2019.
- 2018 - The discount rate used in the September 30, 2017 actuarial valuation decreased by 0.35 percentage points. The valuation also includes the impact of an updated experience study for periods from 2012 to 2017. This resulted in a lower than projected per person health benefit cost to reduce the plan's total OPEB liability by \$1.4 billion in 2018.
